

AbangCebu AI — Protected Route & Middleware Test Scenarios

Version: 1.0.0 | **Ticket:** SCRUM-71 | **Sprint:** 1 — Foundations & Core Infrastructure
Author: Karla Hiyas (QA Engineer) | **Reviewed By:** Hermar Centillas (Lead / Scrum Master)
Status: ✔ Approved | **Framework:** Playwright E2E + Vitest Unit

Coverage Summary: 35 test cases across 7 suites validating Next.js Edge Middleware route protection.
Priority Breakdown: P0: 20 cases P1: 12 cases P2: 3 cases

1. Route Protection Reference Map

ROUTE PATTERN	PROTECTION	UNAUTHENTICATED	WRONG ROLE
/, /map, /search	Public	Allow	Allow
/listings/[id]	Public (Approved)	Allow	Allow
/login, /register	Guest only	Allow	Redirect → role home
/account/*	Authenticated	302 → /login?next=	Allow (own profile)
/renter/*	role = 'renter'	302 → /login?next=	403 Forbidden
/landlord/*	role = 'landlord'	302 → /login?next=	403 Forbidden
/admin/*	role = 'admin'	302 → /login?next=	403 Forbidden

2. Suite 1 — Public Route Access (5 Scenarios)

ID	SCENARIO	EXPECTED RESULT	PRIORITY
TC-MW-001	Guest accesses landing page /	HTTP 200, map canvas renders	P0
TC-MW-002	Guest accesses /map	HTTP 200, no login prompt	P0
TC-MW-003	Guest accesses /search?q=cit-u	HTTP 200, query preserved	P1
TC-MW-004	Guest accesses approved listing detail	HTTP 200, landlord contact hidden	P0
TC-MW-005	Authenticated renter accesses /map	HTTP 200, authenticated navbar	P1

3. Suite 2 — Unauthenticated Redirect Enforcement (7 Scenarios)

ID	SCENARIO	EXPECTED RESULT	PRIORITY
TC-MW-006	Guest → /renter/dashboard	302 → /login?next=%2Frenter%2Fdashboard	P0
TC-MW-007	Guest → /landlord/listings/new	302 → /login?next=%2Flandlord%2Flistings%2Fnew	P0
TC-MW-008	Guest → /admin/users	302 → /login?next=%2Fadmin%2Fusers	P0
TC-MW-009	Guest → /account/settings	302 → /login?next=%2Faccount%2Fsettings	P0
TC-MW-010	Guest → /renter/saved?sort=price	302 with query string preserved in next	P1
TC-MW-011	Guest → /landlord/inquiries/inbox	302 → /login?next=...	P1
TC-MW-012	Guest → /admin/listings/pending	302 → /login?next=...	P1

4. Suite 3 — Role-Based Route Guard (8 Scenarios)

ID	SCENARIO	EXPECTED RESULT	PRIORITY
TC-MW-013	Renter → <code>/landlord/listings/new</code>	403 Forbidden, link to renter dashboard	P0
TC-MW-014	Renter → <code>/admin/users</code>	403 Forbidden	P0
TC-MW-015	Landlord → <code>/renter/saved</code>	403 Forbidden, link to landlord dashboard	P0
TC-MW-016	Landlord → <code>/admin/listings/pending</code>	403 Forbidden	P0
TC-MW-017	Admin → <code>/renter/dashboard</code>	403 Forbidden, link to admin dashboard	P1
TC-MW-018	Admin → <code>/landlord/listings/new</code>	403 Forbidden	P1
TC-MW-019	Renter → <code>/landlord/units/unit-456/edit</code>	403 — deep nested route blocked	P1
TC-MW-020	Landlord → <code>/admin/moderation/flagged</code>	403 — admin moderation blocked	P1

5. Suite 4 — Guest-Only Route Redirect (4 Scenarios)

ID	SCENARIO	EXPECTED RESULT	PRIORITY
TC-MW-021	Renter navigates to <code>/login</code>	302 → <code>/renter/dashboard</code>	P0
TC-MW-022	Landlord navigates to <code>/register</code>	302 → <code>/landlord/dashboard</code>	P0
TC-MW-023	Admin navigates to <code>/login</code>	302 → <code>/admin/dashboard</code>	P1
TC-MW-024	Renter navigates to <code>/login?next=/renter/saved</code>	302 → <code>/renter/saved</code> (honors next)	P1

6. Suite 5 — Session Cookie Renewal (5 Scenarios)

ID	SCENARIO	EXPECTED RESULT	PRIORITY
TC-MW-025	Session TTL > 300s (pass-through)	HTTP 200, no <code>Set-Cookie</code> mutation	P0
TC-MW-026	Session TTL < 300s (silent refresh)	HTTP 200, refreshed <code>Set-Cookie</code>	P0
TC-MW-027	Expired session cookie	302 → <code>/login?next=...</code>	P0
TC-MW-028	Corrupted/tampered session cookie	302 → <code>/login</code>	P0 (sec)
TC-MW-029	Missing cookie + Bearer header	API processes normally	P2

7. Suite 6 — Static Asset & API Bypass (4 Scenarios)

ID	SCENARIO	EXPECTED RESULT	PRIORITY
TC-MW-030	<code>/_next/static/chunks/main.js</code>	Served without redirect	P0
TC-MW-031	<code>/_next/image?url=...&w=640</code>	Image served without redirect	P1
TC-MW-032	<code>/api/health</code>	<code>{"status": "ok"}</code> — not redirected	P0
TC-MW-033	<code>/api/auth/callback?code=...</code>	OAuth callback processed	P0

8. Suite 7 — Suspended Account Interception (2 Scenarios)

ID	SCENARIO	EXPECTED RESULT	PRIORITY
TC-MW-034	Suspended renter → <code>/renter/dashboard</code>	Session cleared, 302 → <code>/login?reason=suspended</code>	P0
TC-MW-035	Suspended landlord → <code>/landlord/listings</code>	Session invalidated, 302 → <code>/login?reason=suspended</code>	P0

9. Coverage Summary

SUITE	CASES	P0	P1	P2	AUTOMATION
Public Route Access	5	3	2	0	Playwright E2E
Unauthenticated Redirect	7	4	3	0	Playwright + Vitest
Role-Based Route Guard	8	4	4	0	Playwright E2E
Guest-Only Route Redirect	4	2	2	0	Playwright E2E
Session Cookie Renewal	5	3	0	2	Vitest (mocked)
Static Asset Bypass	4	2	1	1	Vitest unit
Suspended Account	2	2	0	0	Playwright E2E
Total	35	20	12	3	—
