

Landing Page Wireframe & Layout Specification

Google Maps-Inspired Full-Bleed Map Canvas Architecture for Desktop (1440px) & Mobile (100dvh)

Jira Reference: SCRUM-64

Author: Angel Crushein Yaun (UI/UX Designer)

Design Standards: Balsamiq/Figma Grayscale Blueprint Conventions, Crossed [X] Image Placeholders, WCAG 2.2 AA Ergonomics

Framework: Next.js 16 + React 19 + MapLibre GL JS v6

Reviewed By: Hermar Centillas (Lead / Scrum Master)

Fidelity: MID-FIDELITY WIREFRAME

Status: APPROVED / ACTIVE

1. Executive Summary & Wireframe Methodology

AbangCebu AI replaces traditional brochure rental portals with an authentic **map-first discovery interface**. The landing page **IS** the map—exploring verified rental rooms across Metro Cebu (CIT-U, USC, IT Park, Urgello, Banilad) begins directly on a vector canvas without forced registration walls.

Wireframe Specification Rule: In strict accordance with industry-standard UX blueprint conventions (Balsamiq, Figma), all structural components use a clean **monochrome/grayscale palette**, standard crossed-diagonal [X] media placeholders, realistic browser/device frames, and numbered annotation callouts to define architecture, dimensions, and interaction behaviors prior to visual theming.

2. Desktop Viewport Specification (1440px × 900px · MacBook Air Chassis)

The desktop viewport is encased in an authentic **MacBook Air chassis** (16:10 display ratio) rendering a **100vw × 100vh full-bleed MapLibre canvas**. It replicates Google Maps desktop interaction architecture with an optical centering offset (Left : 492px) so pins remain unobstructed when the results drawer is open.

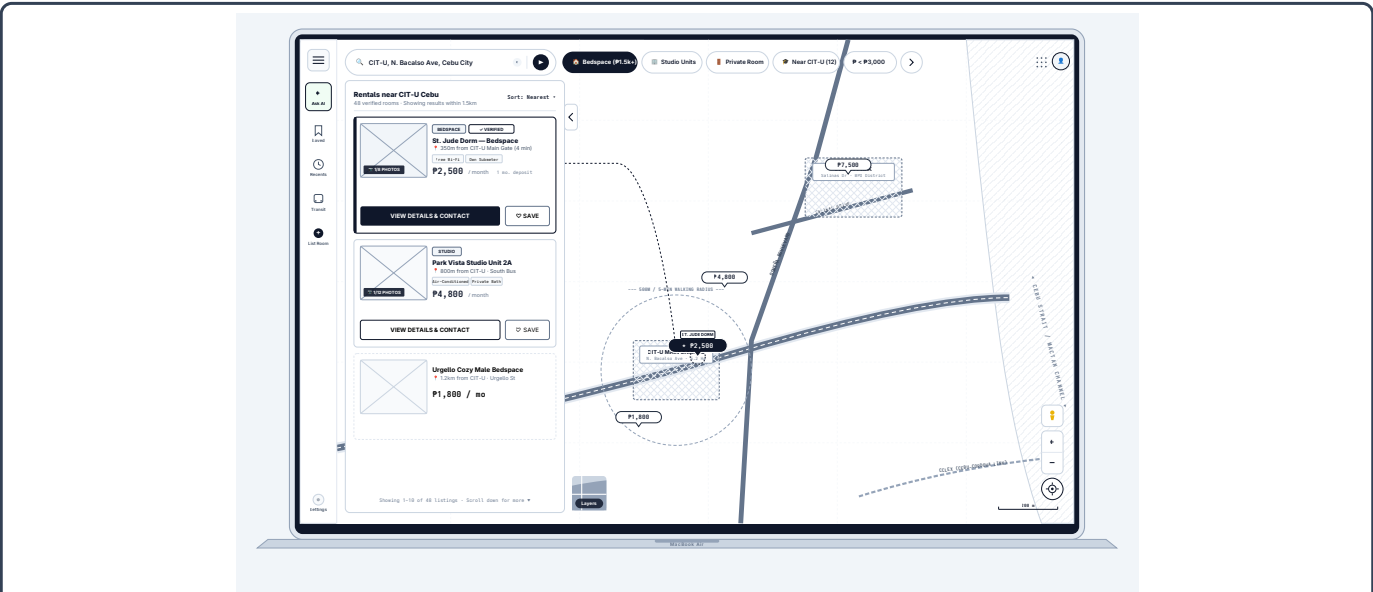

Figure 1: Desktop 1440px Mid-Fidelity Wireframe Blueprint — MacBook Air Aluminum Chassis, 68px Left Rail, Floating Search + Horizontal Chips, 408px Results Drawer, Layers Tile & Controls Stack

Component	Dimensions / Placement	Wireframe Role & Authentic Google Maps Architecture
MacBook Air Chassis	1480 × 950px (Outer)	Aluminum unibody chassis, top FaceTime camera notch, inner matte bezel, and bottom display thumb lip.
Left Vertical Icon Rail	w: 68px, h: 900px (x: 0, y: 0)	Signature Google Maps left rail: Hamburger menu, "Ask AI", "Saved", "Recents", "Transit", "List Room", and "Settings".
Floating Search Box	w: 392px, h: 48px (x: 84, y: 20)	Search input ("CIT-U, N. Bacalso Ave"), clear query trigger, and directions action button.
Horizontal Category Chips	h: 36px (x: 492, y: 26)	Horizontal scrolling filter chips directly beside the search box: Bedspace, Studio, Private Room, Near CIT-U, <P3k.
Floating Results Drawer	w: 408px, h: 800px (x: 84, y: 80)	Results feed with nearest sort, rental cards, crossed [X] media placeholders, verified badges, amenity chips, deposit terms.
Drawer Collapse Toggle	w: 24px, h: 48px (x: 492, y: 120)	Single-click chevron button (<) sliding drawer off-screen for 100% full-screen map exploration.
Bottom-Left "Layers" Tile	68 × 68px (x: 504, y: 810)	Signature Google Maps satellite/topographic layer switch widget docked on the open canvas beside the drawer.
Bottom-Right Controls Stack	w: 40px (x: 1380, y: 680)	Street View pegman, zoom (+/-) buttons, GPS Locate Me FAB, and calibrated 200m scale bar.

Mobile Viewport Wireframe Specification (393px × 852px · 100dvh)

Google Maps-Style 3-Snap Bottom Sheet Drawer Interaction Blueprint · Dynamic Viewport Height (100dvh)

3. Mobile 3-Snap Point Bottom Sheet Mechanics

The mobile viewport standardizes on **100dvh** (Dynamic Viewport Height) encased in an authentic **iPhone 16 Pro Titanium chassis** to eliminate iOS Safari address bar clipping. Overlaid on the full-bleed map are a top floating search pill, docked GPS Locate Me button, and a **3-Snap Point Bottom Sheet Drawer** shown across all three distinct states:

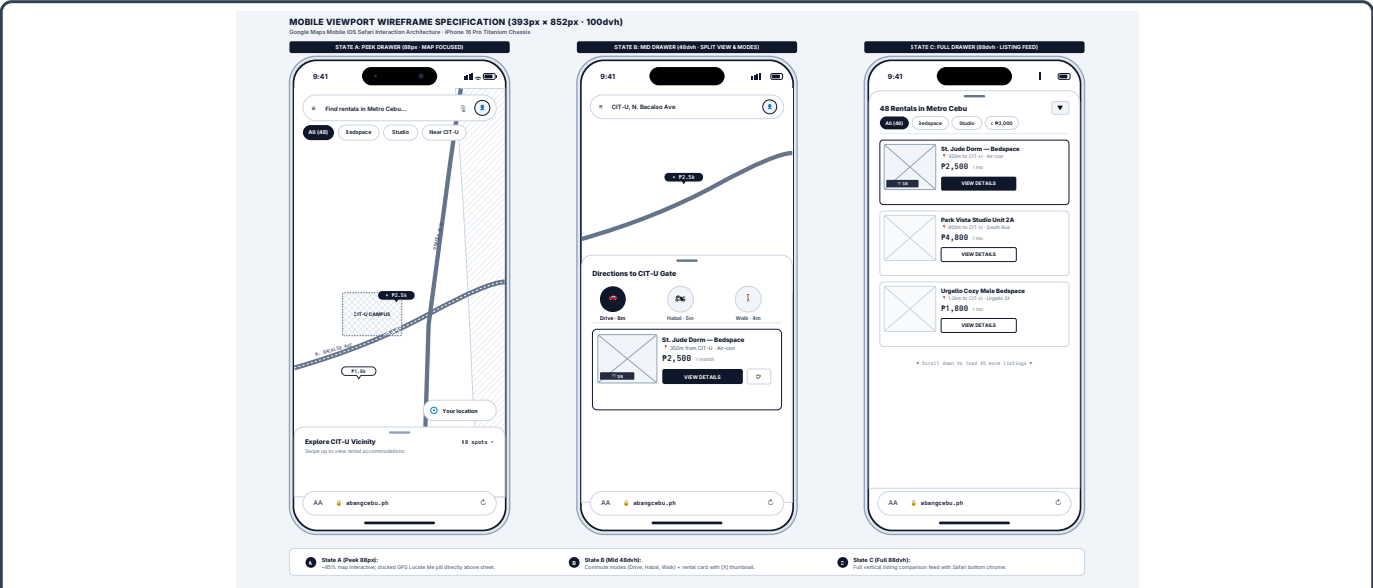

Figure 2: Mobile 100dvh Mid-Fidelity Wireframe Blueprint — iPhone 16 Pro Titanium Chassis, Dynamic Island, State A (Peek 88px), State B (Mid 48dvh with Commute Modes), State C (Full 88dvh Feed), and iOS Safari Bottom Chrome

Snap State	Sheet Height	User Experience & Visible Feed	Interaction & Gesture Physics
State A: Peek	88px (~15% Viewport)	Map is ~85% visible. Shows drag handle (—), "48 rentals near CIT-U" count, and quick sort pill.	Single upward swipe or tap snaps to Mid state. Map panning and pin taps remain fully interactive.
State B: Mid	48dvh (~400px)	Split view: Top 52% map active with highlighted pin. Bottom sheet shows horizontal carousel of listing cards (snap-x).	Horizontal swipe switches cards and synchronizes highlighted pin on map. Upward pull expands to Full state.
State C: Full	88dvh (~740px)	High-density listing feed. Full vertical scrollable card list for focused property comparison. Top search bar minimized.	Internal scroll for listings; downward pull on top grabber snaps back to Mid or Peek state. Dismiss chevron available.

Mobile Touch Ergonomics & Safety Guardrails:

- **WCAG 2.2 AA 44x44px Touch Targets:** Enforced via `@utility touch-target` on all buttons, filter pills, close triggers, and floating action buttons.
 - **Anti-Zoom 16px Rule:** Mobile input font-size strictly locked to `16px (text-base)` to eliminate iOS Safari destructive auto-zoom.
- **Thumb Zone Optimization:** Bottom sheet drag handle and floating GPS Locate Me FAB are docked in the lower natural reach area.
 - **Dynamic Viewport Lock:** Root container uses `100dvh overscroll-none touch-none` preventing rubber-band displacement.

Component Breakdown, Design Tokens & Governance

Next.js 16 Server/Client Boundaries · Z-Index Hierarchy · Definition of Done

4. Next.js 16 Component Hierarchy & Boundaries

Component	Runtime	File Location	Architectural Role
LandingMapLayout	SERVER	src/app/page.tsx	Resolves URL query parameters, executes Supabase spatial query, streams listings to client.
MapLibreCanvas	CLIENT	src/components/map/maplibre-canvas.tsx	Initializes WebGL MapLibre GL instance, loads OpenFreeMap vector style, renders price markers.
FloatingSearchCard	CLIENT	src/components/features/floating-search-card.tsx	Desktop 410px floating card, landmark auto-suggest dropdown, collapsible chevron toggle.
MobileBottomSheet	CLIENT	src/components/features/mobile-bottom-sheet.tsx	Mobile 3-snap gesture drawer (Peek/Mid/Full), drag handle, horizontal carousel.
MapOverlayHUD	CLIENT	src/components/map/map-overlay-hud.tsx	Floating "Search this area" button, zoom controls (+/-), GPS Locate Me FAB, Ask AI trigger.
ListingDetailModal	CLIENT	src/components/features/listing-detail-modal.tsx	Full listing detail drawer (hero photo gallery, fee breakdown, jeepney routes 04L/17B, inquiry CTA).

5. Design Tokens & Z-Index Stacking Hierarchy

Layer Role	Z-Index Token	Target Elements
Canvas	z-0	WebGL MapLibre base map surface
Vector Overlays	z-10	GIS walking radius circles, jeepney paths
Price Pins	z-20 / z-25	Unselected (z-20) vs Active pin (z-25)
Desktop Panel	z-10	Floating search & results card (410px)
Map Controls	z-30	Zoom buttons (+/-), GPS Locate Me FAB
Search / Pills	z-40	Mobile floating top search pill & filter bar
Bottom Sheet	z-50	Mobile 3-snap bottom sheet drawer
Modals	z-80	Full listing detail modal & photo lightbox

Design Token Integration:

All wireframe dimensions map directly to Tailwind CSS v4 design tokens in `src/app/globals.css` :

- sheet-collapsed-height : calc(env(safe-area)+88px)
- sheet-mid-height : 48dvh (~400px)
- sheet-expanded-height : calc(100dvh-env(safe-area)-16px)
- @utility touch-target : min-w-[44px] min-h-[44px]
- @utility touch-target-expanded : min-w-[48px] min-h-[48px]

6. Definition of Done & Architectural Sign-Off

- [x] **Mid-Fidelity Wireframe Standard:** Drafted strictly using grayscale blueprint conventions, crossed [X] media boxes, browser window chrome, and smartphone chassis.
- [x] **Desktop Specification:** 1440px × 900px full-bleed map, 410px floating search & feed card, collapsible chevron toggle, and optical camera centering offset (+432px).
- [x] **Mobile 3-Snap Specification:** 100dvh dynamic viewport protection, State A (Peek 88px), State B (Mid 48dvh), and State C (Full 88dvh) side-by-side comparative blueprint.
- [x] **Local Metro Cebu Grounding:** Landmarks (CIT-U, IT Park, USC), jeepney commute routes (04L, 17B, 13C), transparent submeters, and anti-scam advisories integrated.
- [x] **Accessibility Compliance:** WCAG 2.2 Level AA 44×44px touch targets and 16px mobile input zoom prevention rule enforced.
- [x] **Sprint 1 Boundary Maintained:** Purely architectural wireframe blueprints and data contracts; ZERO premature React/JSX feature code.
- [x] **Authentic Attribution:** Authored by **Angel Crushein Yaun (UI/UX Designer)**; Reviewed and Approved by **Hermar Centillas (Lead / Scrum Master)**.
