

Login Page Wireframe & Layout Specification

50/50 Split-Screen Spatial Trust & Authentication Architecture · MacBook Air 16:10 Frame (1440px)

Jira Reference: SCRUM-65

Author: Neah Moneva (UI/UX Designer)

Design Standards: Balsamiq/Figma Grayscale Blueprint Conventions, Apple HIG Ergonomics, WCAG 2.2 AA Contrast & Touch Rules

Framework: Next.js 16 + React 19 + Supabase Auth

Reviewed By: Hermar Centillas (Lead / Scrum Master)

Fidelity: MID-FIDELITY WIREFRAME

Status: APPROVED / ACTIVE

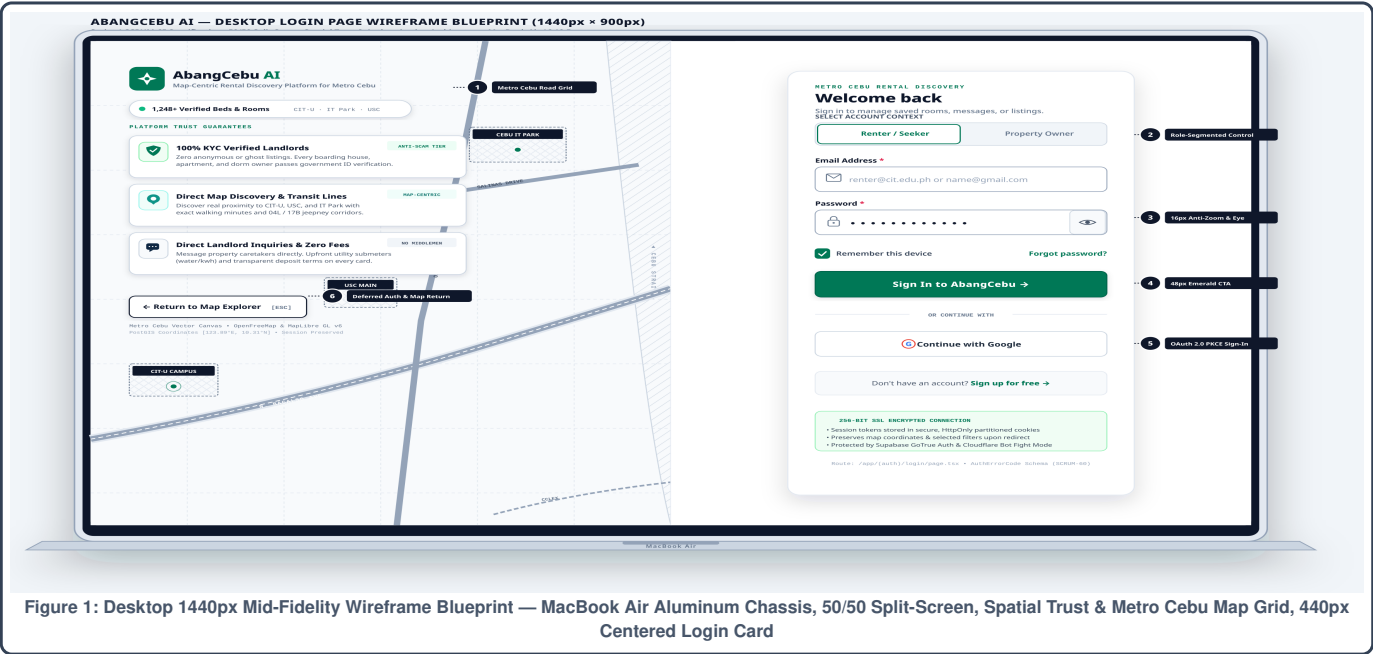

1. Executive Summary & Map-First Authentication Philosophy

AbangCebu AI replaces traditional brochure rental portals with an authentic **map-first discovery interface**. The landing page **IS** the map—exploring verified rental rooms across Metro Cebu (CIT-U, USC, IT Park, Urgello, Banilad) begins directly on a vector canvas without forced registration walls. Authentication is strictly deferred until high-intent actions (saving favorites, contacting landlords, booking oculars).

Spatial State Preservation Rule: When an unauthenticated seeker initiates a gated action, the current viewport coordinates, zoom level, and selected listing ID are preserved via URL parameter (/login?returnTo=%2Fmap%3Flat%3D10.2942%26lng%3D123.8659%26zoom%3D15). Upon successful sign-in, the user returns seamlessly to their exact spatial context without loss of research flow.

2. Desktop Viewport Specification (1440px × 900px · MacBook Air Chassis)

The desktop viewport is encased in an authentic **MacBook Air chassis** (16:10 display ratio). It features a balanced **50/50 split-screen architecture**: the left pane grounds the seeker in Metro Cebu spatial trust with live listing counts, road arteries, and 3 KYC trust guarantees; the right pane presents a focused, 440px maximum-width login card.

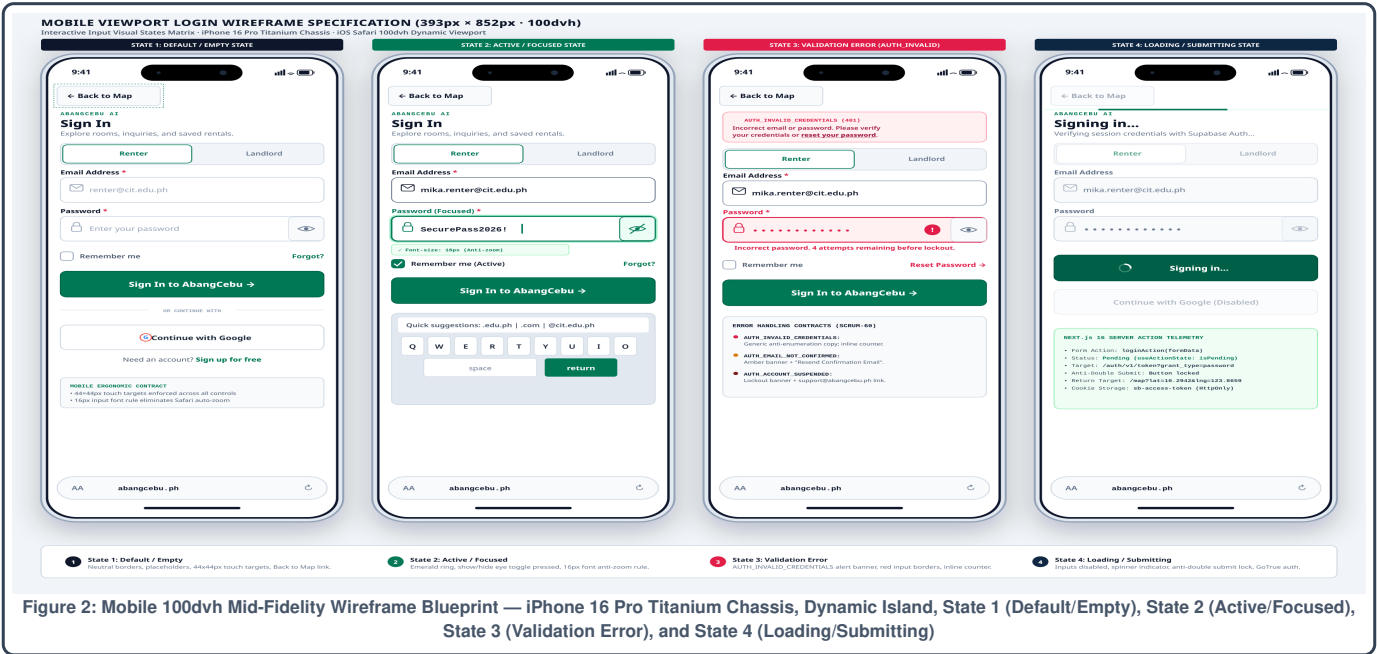

Component	Dimensions / Placement	Wireframe Role & Authentic Design Architecture
MacBook Air Chassis	1480 × 950px (Outer)	Aluminum unibody chassis, top FaceTime camera notch, inner matte bezel, and bottom display thumb lip.
Left Spatial Trust Pane	w: 720px, h: 900px (x: 0, y: 0)	Metro Cebu road network (N. Bacalso Ave, Osmeña Blvd, Salinas Dr, CCLEX), anchor nodes (CIT-U, IT Park, USC), and Mactan Channel hatch.
Live Listing Stats Badge	w: 360px, h: 34px (x: 48, y: 122)	Live count badge: "1,248+ Verified Beds & Rooms in Metro Cebu" with active green status pill.
3 Core Trust Pillars Stack	w: 430px (x: 48, y: 180)	100% KYC Verified Landlords (Anti-Scam Tier), Direct Map Discovery & Transit Walking Lines, Direct Inquiries & Zero Broker Fees.
Return to Map Trigger	w: 230px, h: 42px (x: 48, y: 660)	Secondary button with ↶ icon and keyboard shortcut hint [ESC]. Preserves search parameters.
Right Pane Login Card	w: 440px, h: 788px (x: 860, y: 56)	Centered 440px elevated card with 36px padding, subtle drop shadow, and clean vertical visual rhythm.
Role-Segmented Control	w: 368px, h: 42px	Accessible segmented tablist (Renter / Landlord). Active tab features emerald border, bold text, and ARIA role="tablist".
Input Fields & Show/Hide Eye	w: 368px, h: 48px	Email and Password fields with 48px height, 16px font rule, and dedicated 44×44px password visibility toggle eye button.
Primary Sign In CTA	w: 368px, h: 48px	High-contrast Cebu Emerald (#047857) button, rounded-1g, white bold typography (WCAG 2.2 AA compliant 5.1:1 contrast).
Google OAuth Federation	w: 368px, h: 46px	Official Google sign-in trigger initiating Supabase OAuth 2.0 PKCE flow with preserved return URL.

Mobile Viewport Wireframe Specification (393px × 852px · 100dvh)

Interactive Input Visual States Matrix · iPhone 16 Pro Titanium Chassis · iOS Safari 100dvh Dynamic Viewport

3. Mobile Viewport Geometry & Touch Ergonomics

The mobile viewport standardizes on 100dvh (Dynamic Viewport Height) encased in an authentic iPhone 16 Pro Titanium chassis to prevent iOS Safari address bar clipping. It enforces strict 44x44px touch targets and the 16px input font rule to eliminate destructive auto-zooming. Overlaid below is the side-by-side comparative blueprint across all 4 interactive states:

Visual State	Visual Attributes	User Experience & Error Contracts	Ergonomic & Technical Governance
State 1: Default / Empty	Neutral borders (#CBD5E1), gray placeholders (#94A3B8), closed eye toggle.	Presents clear Renter/Landlord role tabs, email/password placeholders, and Google OAuth button.	Strict 44x44px touch targets; ← Back to Map top safe-area header action button.
State 2: Active / Focused	Emerald focus ring (#047857 , 2px), blinking cursor, eye-slash pressed.	Plaintext password revealed upon toggle tap (SecurePass2026!); active suggestion pills.	Input font-size locked to 16px (font-size: 16px !important) to prevent Safari zoom.
State 3: Validation Error	Crimson border (#E11D48), light red background (#FFF1F2), warning badge.	Displays top alert banner (AUTH_INVALID_CREDENTIALS) + inline attempt countdown (SCRUM-60).	Linked with aria-describedby; screen reader alert announced via role="alert".
State 4: Loading / Submitting	Disabled inputs (opacity-60), rotating vector spinner inside CTA button.	Button label changes to "Signing in...", click events disabled to prevent double-submission.	Server Action execution with Supabase GoTrue; session token written to HttpOnly cookie.

Mobile Touch Ergonomics & Safety Guardrails:

- **WCAG 2.2 AA 44x44px Touch Targets:** Enforced via @utility touch-target on all buttons, segmented tabs, eye toggles, and checkboxes.
- **Anti-Zoom 16px Rule:** Mobile input font-size strictly locked to 16px (text-base) to eliminate iOS Safari destructive auto-zoom.
- **Thumb Zone Optimization:** Role tabs, inputs, and primary "Sign In" button are centered in the lower two-thirds natural reach zone.
- **Dynamic Viewport Lock:** Root container uses 100dvh overscroll-none preventing rubber-band displacement while interacting.

Accessibility, Component Contracts & Sign-Off

WCAG 2.2 AA Tab Order Flow · Next.js 16 Server/Client Boundaries · Definition of Done

4. Sequential Keyboard Tab Order & WAI-ARIA Matrix

Tab Order	Element	Accessible Name	ARIA Roles & States	Keyboard Activation
1	← Back to Map	"Back to Map Explorer"	role="link"	Enter / Space
2	Renter Role Tab	"Renter account context"	role="tab", aria-selected="true"	ArrowRight to Landlord
3	Landlord Role Tab	"Landlord account context"	role="tab", aria-selected="false"	ArrowLeft to Renter
4	Email Input	"Email Address, required"	type="email", aria-required="true"	Standard typing; Tab
5a	Password Input	"Password, required"	type="password", aria-required="true"	Standard typing
5b	Show/Hide Eye Toggle	"Toggle password visibility"	role="button", aria-pressed="false"	Enter / Space toggles
6a	Remember Me Checkbox	"Remember this device (30 days)"	role="checkbox", aria-checked="true"	Space toggles check
6b	Forgot Password Link	"Forgot password?"	role="link"	Enter routes to recovery
7	Sign In CTA Button	"Sign In to AbangCebu"	type="submit", aria-busy="false"	Enter / Space submits
8	Google OAuth Button	"Continue with Google"	role="button"	Enter triggers OAuth
9	Sign Up Link	"Sign up for free"	role="link"	Enter routes to register

5. Next.js 16 Component Hierarchy & Boundaries (Sprint 2 Contract)

Component	Runtime	File Location (Sprint 2)	Architectural Role & Contract
LoginPage	SERVER	src/app/(auth)/login/page.tsx	Validates searchParams.returnTo open-redirect whitelist. Streams metadata & wraps form.
LoginForm	CLIENT	src/components/auth/login-form.tsx	React 19 useActionState form container managing input states, pending transitions, and focus rings.
RoleSelector	CLIENT	src/components/auth/role-selector.tsx	Accessible WAI-ARIA tablist segmented control switching between Renter and Landlord identity modes.
SocialAuthButtons	CLIENT	src/components/auth/social-auth-buttons.tsx	Executes Google OAuth 2.0 PKCE authorization flow via supabase.auth.signInWithOAuth().
AuthAlertBanner	CLIENT	src/components/auth/auth-alert-banner.tsx	Renders accessible standardized AuthErrorResponse payloads (SCRUM-60) with actionable recovery hints.

6. Definition of Done & Architectural Sign-Off

- [x] **Mid-Fidelity Wireframe Standard:** Balsamiq/Figma grayscale blueprints, crossed [X] placeholders, and authentic MacBook Air / iPhone 16 Pro chassis.
- [x] **Desktop Specification:** 1440×900px, 50/50 split-screen layout, Metro Cebu spatial map network, live stats badge, and centered 440px login card.
- [x] **Mobile 4-State Specification:** 100dvh viewport, State 1 (Default), State 2 (Active/Focused), State 3 (Validation Error), and State 4 (Loading/Submitting).
- [x] **Accessibility Compliance:** WCAG 2.2 AA 44×44px touch targets, 16px mobile input anti-zoom rule, contrast >= 4.5:1, and sequential tab order flow.
- [x] **Sprint 1 Boundary Maintained:** Purely architectural wireframe blueprints and data contracts; ZERO premature React/JSX feature code.
